Re: Nuclear Power Plants

Dear Commissioners,

I am not sure if I will be there in person today. I do have a few questions regarding current and future plans of ageing, decaying nuclear power plants and the health of our economic environment when an accident happens.

1. Has the CEC done any projections for nuclear power plant phase out at SONGS and/or Diablo Canyon? If yes, what are they?
If no, and steam generator replacement is denied, how will CEC provide power?
2. What is the CEC's position on expanded storage of high-level Radioactive waste?
3. Is the CEC concerned about security at California's Nuclear facilities?
If yes, what are you doing about it? If not, why not?

I look forward to your response as soon as possible.

Thank you,

Shirley Vaine
